

## GLASS BEAD GUN WITH ATOMIZING AIR AND VENTURI SYSTEM

This gun is completely made of aluminium. It can be fed with glass beads from a suction hose, which is immersed in a bead tank.

### CONNECTIONS:

Atomizing air                      1/4 "  
Ø passage of beads              8 mm

### BEAD NOZZLE:

Ø 8.5 mm

### AIR NOZZLE:

Ø 2 mm

### DIFFUSER

The gun is equipped with an adjustable (orientation and width) diffuser to spread the glass beads equally over a wide line up to 25 cm.

The hose for glass beads must have an internal diameter of 16 mm and a maximum length of 8 m. We can supply this hose with the gun.

The gun can also be equipped with a 400 mm long extension made of aluminium, which can be very easily and quickly fitted on the head of the gun (on request).

### RECOMMENDATIONS

- For air connection, use rather a Ø 10 mm hose

### SPECIFICATIONS

	<b>WITH DIFFUSER</b>
Dimensions:	330 x 60 mm
Weight without hose:	1.0 kg (with extension: 1.4 kg)
