

GLASS BEAD GUN WITHOUT ATOMIZING AIR

This gun is equipped with a hardened steel closing piston (which is adjustable with a screw). It must be fed with glass beads from a pressurized tank. The assembly of the gun makes it possible to orient the inlet of the glass beads at 120°.

CONNECTIONS:

Opening air 1/4"
 Ø passage of beads 11.5 mm

BEAD NOZZLE:

Ø 4 to 10.9 mm

DIFFUSER

The gun is equipped with an adjustable (orientation and width) diffuser to spread the glass beads equally over a wide line up to 30 cm. It has a stiffening plate in carbide to increase its lifetime. This can be easily replaced when it wears out. The diffuser can be equipped with a glass bead sensor to avoid having a line without glass beads (on request). This sensor is connected to an electronic device, which manages the gun(s) in action and the alarms (on request).

RECOMMENDATIONS

- For air connection, use rather a Ø 8 mm hose
- Use an opening air pressure of 6 bar (87 psi)
- To improve the flow of glass beads (speed, quantity), add our injection tube 8304S-C with air connection (option on request).

SPECIFICATIONS

	WITHOUT DIFFUSER	WITH DIFFUSER
Dimensions:	170 x 55 mm	280 x 55 mm
Weight:	1.5 kg	2.4 kg
